John Baza
Director,
Utah Division of Oil, Gas and Mining

RE: American Sands Energy Corp/Green River Resources, Inc. Bruin Point Mine M0070040

Dear Mr. Baza:

Per our phone conversation last Thursday, here is the ownership information you asked me to send and some of our related concerns.

On the 640-acre parcel, we, Robert and Nancy Schonlau, collectively own the majority 55% undivided mineral interest and Resource Associates, LLC (owned 100% by the Schonlau's) owns the majority 71 2/3% surface interest. We have not been contacted by American Sands Energy Corp. or any of their representatives about their mining plans being proposed to UDOGM on our property.

We became aware of this a couple of weeks ago by reading a public press release. On April 18th we contacted Paul Baker at UDOGM to see if any of ASEC's mining plans were available to the public. He directed us to your division's website to view ASEC's preliminary plans and NOI.

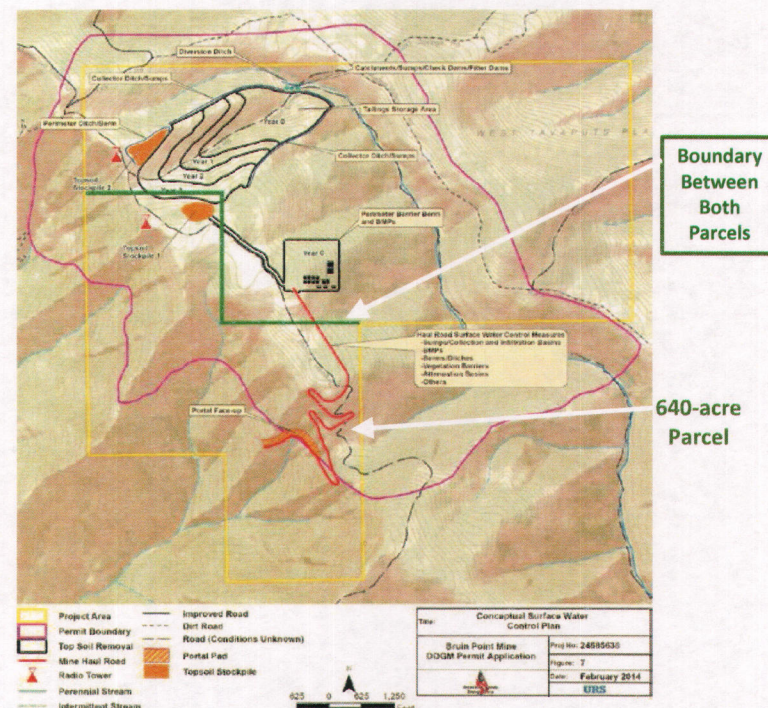

After looking at the ASEC maps and plans provided to UDOGM, of great concern to us are the use and sale of our minerals without compensation, the 100' wide 8,700' long proposed new mine haul road, 50' wide portal, 350' x 1,500' crushing plant at the portal, 1/2 mile long portal tunnel, staging areas, cutting and selling of timber, the extensive overall impacts of year round 24/7 mining operations, drilling, blasting, crushing, screening, traffic, trucks, 70,000 tons of revolving stockpiling of ore. In addition to these items, the 2+ acre permanent pad at the portal would also function as the first processing plant and facility with office buildings, maintenance shop, material handling equipment area, fuel station, supply storage and a change house.

We are very concerned for our ownership interests. There has been no compensation, communication or discussion with us regarding the use of our majority ownership interests in the 640-acre parcel in their mining plans.

Accordingly, we categorically object to the permitting of the Bruin Point Mine (M/007/0040) as it is being proposed by American Sands Energy Corp. and Green River Resources, Inc.

ASEC/Green River Resources, Inc. have leased only 5% and 21 2/3% of the undivided surface and mineral interests, respectively, on our 640-acre parcel.

Sincerely,
Robert Schonlau
Nancy Schonlau
Resource Associates, LLC
